

CERTIFICATE OF PERFORMANCE

Date: July 2021

Product Type: Fireproofed Oil Tank Range (various capacities available)

Product Imagery:

Intended Use: This tank is to be used for the storage of heating oils and certain other oils (please ask) and in locations where 60 minute fire protection is a requirement.

Details: This is a triple skin tank with integral fireproofing providing in excess of 60 minutes fire protection to the primary storage tank and contents. The tank is manufactured by Atlantis Tanks Group Ltd. The primary or inner tank is fitted with a 2" fill point, a gauge port, a suction port and a tank/bund vent. The secondary skin provides the necessary 110% full bund capacity which is also entirely protected by the integral fireproofing which is encased in the third or tertiary skin. This is a unique foam glass panel providing an outstanding protection against heat and flame. The foam glass is non-absorbent ensuring no oil can ever be 'wicked' up into it. Unlike a mere rock wool slab or insulation system, this is a product that is used to protect the most demanding and large storage capacity tanks for oil, gas and other highly flammable products and in building systems. The glass panel surrounds the entire tank across all 6 sides providing a solid and unparalleled protection. The tank is very secure with a full locking lid providing safety and peace of mind in the most demanding circumstances. There are 4 lifting eyes for the safe movement and installation of the tank. The tank has a 1" bottom outlet. The tank is guaranteed for 10 years. This guarantee covers the functional ability of the tank for its intended use. We recommend regular external painting of the tank to provide an even greater longevity.

Conforms to: The internal tank is manufactured to BS799 pt 5. The secondary bund tank meets the EA requirements for the control of pollution (oil storage regulations). The fireproofing foam glass protection provides the necessary 60 minute fire protection for the tank when used in an outdoor domestic dwelling situation as required by the Building Control department. The foam glass protection provides a Euroclass A1 fire protection to the EN14305 standard

Place of Manufacture: The tank is made in the UK. The foam glass panels are made in Belgium

Signed on behalf of Atlantis Tanks Group Ltd

Jon Mytton - Director

Certification: See certificates below...

Reaction to fire classification report No. 17465B

Owner of the classification report

Pittsburgh Corning Europe (PCE) Albertkade 1 3980 Tessenderlo Belgium

Introduction

This classification report defines the classification assigned to the product 'FOAMGLAS® W+F, FOAMGLAS® T3, FOAMGLAS® T3+, FOAMGLAS® T4+, FOAMGLAS® ONE, FOAMGLAS® S3, FOAMGLAS® F, FOAMGLAS® TAPERED, FOAMGLAS® PT and FOAMGLAS® HLB' following the Commission Decision of 4 October 1996 (96/603/EG), as amended by 2000/605/EG and 2003/424/EG, establishing the list of products belonging to Class A1 'No contribution to fire' – General note: a material shall not consist of more than 1,0 % by weight or volume of homogeneously distributed organic material. This Commission Decision is referenced in the European Classification Standard EN 13501-1:2007+A1:2009.

The organic content of "FOAMGLAS®" has been determined in accordance with the procedures given in the standard EN 13820:2003: Thermal insulating materials for building applications – Determination of organic content.

This classification report consists of 5 pages

Classification report No. 17465B Page 2 of 5

1. DETAILS OF CLASSIFIED PRODUCTS

a) Nature and end use application

The products FOAMGLAS® W+F, FOAMGLAS® T3, FOAMGLAS® T3+, FOAMGLAS® T4+, FOAMGLAS® ONE, FOAMGLAS® S3, FOAMGLAS® F, FOAMGLAS® TAPERED, FOAMGLAS® PT and FOAMGLAS® HLB are defined as "unfaced cellular glass slabs".

Their classification is valid for the following end use application(s):

Used as thermal insulation for buildings (according to EN 13167) and thermal insulation for building equipment and industrial installations (according to EN 14305).

b) Description of the tested products

This description is based on information given by the sponsor.

	Nominal values
FOAMGLAS® W+F	5. E (19.50) Den (19.50) Levis
Type of product	The tested product is an unfaced cellular glass slab.
Manufacturer	PCCR-Pittsburgh Corning
Thickness (mm)	100
Density (kg/m³)	100 ± 10 %
Use of fire retardants	No
Colour	Black
FOAMGLAS® T3+	with the second
Type of product	The tested product is an unfaced cellular glass slab.
Manufacturer	Pittsburgh Corning Europe (PCE)
Thickness (mm)	100
Density (kg/m³)	100 ± 10 %
Use of fire retardants	No
Colour	Black
FOAMGLAS® HLB 2400	**
Type of product	The tested product is an unfaced cellular glass slab.
Manufacturer	Pittsburgh Corning Europe (PCE)
Thickness (mm)	100
Density (kg/m³)	200 ± 15 %
Use of fire retardants	No
Colour	Black

WFRCENT my is sen spin-off bedrijf van de Universiteit Cent, voorheen Laboratorium voor Aanwending der Brandstoffen en Warmteoverdracht - Afdeling Brandveiligheid
WFRCENT my is a spin-off company from the University of Cent, previously the Laboratory for Heat Transfer and Fuel Technology - Division Fire Batety
WFRCENT sa est une compagnie spin-off de l'Université de Gand, autretois le Laboratoire pour l'Emploi des Combustibles et la Transmission de la Chaleur - Division Bécurité Incendie

2. TEST REPORTS AND TEST RESULTS IN SUPPORT OF THIS CLASSIFICATION

a) Test reports

Name of the laboratory	Name of the sponsor	Test report ref. No.	Test method	
WFRGENT nv Ghent, Belgium	Pittsburgh Coming Europe Tessenderlo, Belgium	16658A 16658B 17465A	EN 13820 (September 2003)	
WFRGENT nv Ghent, Belgium	Pittsburgh Corning Europe Tessenderlo, Belgium	16658D	EXAP according to CEN/TS 15117 (August 2005)	

b) Test results

	Parameter Number of tests		Results		Criteria for Class A1	
Test method		Continuous parameters Mean	Compliance parameters			
				Continuous parameters	Compliance parameters	
EN 13820 (1)	M _{oc}	5	0,09 %	(-)	≤ 1,0 %	(-)
EN 13820 (2)	M _{oc}	5	0,05%	(-)	≤ 1,0 %	(-)

⁽⁻⁾ Not applicable.

⁽²⁾ Based on the results obtained in test report No. 17465A.

2	M _{oc} (%)	
FOAMGLAS® W+F (100 kg/m³)	0,05	
FOAMGLAS® HLB 2400 (200 kg/m³)	0,11	

Based on the results obtained in test report No. 16658A: Only one single test on each product has been carried out instead of the standard five replicates.

⁽¹⁾ Based on the results obtained in test report No. 16658B.

Classification report No. 17465B Page 4 of 5

3. CLASSIFICATION AND FIELD OF APPLICATION

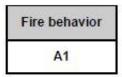

a) Reference of classification

This classification has been carried out in accordance with:

- Commission Decision of 4 October 1996 (96/603/EG), as amended by 2000/605/EG and 2003/424/EG, establishing the list of products belonging to Class A1 'No contribution to fire' – General note: a material shall not consist of more than 1,0 % by weight or volume of homogeneously distributed organic material. This Commission Decision is referenced in the European Classification standard EN 13501-1:2007+A1:2009.
- EN 13167.

b) Classification

The products "FOAMGLAS® W+F, FOAMGLAS® T3, FOAMGLAS® T3+, FOAMGLAS® T4+, FOAMGLAS® ONE, FOAMGLAS® S3, FOAMGLAS® F, FOAMGLAS® TAPERED, FOAMGLAS® PT and FOAMGLAS® HLB" in relation to their reaction to fire behavior are classified as:

c) Field of application

This classification is valid for the following product parameters:

- Nominal thickness: All thicknesses
- Nominal density: All densities between or equal to 100 ± 10 kg/m³ and 200 ± 30 kg/m³
- Use of fire retardants: No
- Colour: Black

Classification report No. 17465B Page 5 of 5

4. RESTRICTIONS

At the time the standard EN 13501-1:2007+A1:2009 was published, no decision was made concerning the duration of validity of a classification report.

Provisions of Regulation (EU) 305/2011, commonly known as the Construction Products Regulation (CPR), prevail over any conflicting provisions in the harmonised standards and technical specifications.

WARNING

This classification report does not represent type approval nor certification of the product.

The classification assigned to the product in this report is appropriate to a Declaration of Performance (DoP) of the essential characteristics of the construction product by the manufacturer within the context of a System 1 Assessment and Verification of Constancy of Performance (AVCP).

Under the Construction Products Regulation (CPR: EU 305/2011), such a Declaration of Performance (DoP) is a requirement for affixing the CE marking.
